

“Mathematical training gives you the tools necessary to analyse and solve problems in any industry where technology is contributing to rapid change.”

Martin Caden

Digital Technology Manager,
DisneyToon Studios, Sydney

With an aptitude and fascination for technology, Martin chose to study mathematics (with a major in computing) to improve his problem solving and analytical abilities. He worked as a Systems Manager at UTS and was involved in research and teaching in computer graphics. In 1997 he joined DisneyToon Studios in Sydney to oversee the introduction of digital tools and processes, and provide technical direction and leadership.

Education summary:
