Are you hoping for a good job that pays well?

Do you want to improve your knowledge of Maths, Science and IT?

Do you think girls can be successful at Maths and Science?

Do you use a computer at school?

Are you doing intermediate or advanced Maths at school?

Have you ever wondered why bridges stay up?

If you answered yes to most of the above, talk to your teacher or career adviser about joining us in Newcastle for five days of practical and fun Maths, Science and IT activities. You do not need to be top in Maths, Science or Computing - we are looking for girls interested in learning and improving their chances for the future.

Conditions apply - This program supports students from Equity Target Groups.

6 to 11 December 2009
